We understand that the broadband construction in Congress is finished. When will we be able to sign up for service? The construction in Congress is effectively completed with the exception of connecting the main trunk line from Wickenburg to "light up" the entire system. Cox is waiting on a couple of ADOT permits and we expect that with a few weeks. We are planning on a ribbon cutting event to be part of Supervisor Oberg's Town Hall which will be held on October 25th starting at 5:30 pm at the Congress Water District. Cox will be there and will be taking orders for service.
