

**# 63 2.1.24 In regard to Cox maps of Black Canyon City, please clarify the colored coding.** The orange dotted lines that you see throughout the map are where we are designed to place fiber, once conduit is placed underground we will highlight the section green. Aerial fiber will be highlighted solid orange when complete, when its permitted and we will start building soon it will be highlighted pink, the lines will also be thicker as you can see with the completed areas of underground. If your area is currently underground for existing utilities the fiber will also be underground we will not be adding any telephone or arial poles.
