

66 7.5.24 About 2 months ago COX installed fiber optic cable in the ground on my street in Black Canyon City. I need to know when COX will start to offer connectivity to my actual home. We are shooting for the end of the year (2024). They have encountered some rough terrain along the way, but hopefully most of that is done at this point. Several crews are working on both underground and aerial lines. Appreciate the question.
